Sport Palace

Visual Comfort

A perfect, diffuse, uniform light,
for a great Sport performance

Excellent light Distribution and Uniformity

High Color Rendering Index CRI up to 91

No Glare

No photo-biological hazards

No Flickering

High Performance

Efficiency, Reliability and Duration

AGE induction lighting is the perfect solution for the Sport centres, solving most of the criticalities related to lighting, thanks to the best efficiency on the market, with the lesser energy consumption, the longest lifespan, the virtually maintenance free and, at the same time, with the perfect light for sport areas.

With a high color rendering index and no glare, the player will make a better performance with no risks for the eyes, headache or other inconvenience, at the same time the audience will enjoy a perfect and uniform lighting, as well as the TV operator that will be able to film without flickering and with a clarity never experienced before.

- Lamp's lifespan up to 110.000 hours
- Ballast lifespan up to 330.000 hours
- Instant start, instant restrike
- High Power Factor ($\cos\phi$) $\geq 0,98$
- Very low Harmonic Distorsion THD $<2,5\%$
- Very flexible working Temperature (-35°C / $+85^{\circ}\text{C}$)
- High Color Rendering Index (CRI) up to 91
- Very low lumen depreciation, $<15\%$ after 90.000 hours
- Dimmable flux with linear consumption reduction
- Smart lighting optionals: Wi-Fi, DALI, Smart sensors, etc..
- Maintenance free

AGE Induction Lighting is the optimal choice for large areas, able to satisfy the highest standards of quality and efficiency.

AGE Lighting represent the new generation of Lighting, de facto the most advanced lighting technology, that will replace the various lighting technology existing in the market.
